1 System Overview & Basics

The AEQUS Reminder System is a centralized platform designed to automate your workflow. It ensures that crucial tasks, deadlines, and notifications are dispatched via email exactly when they need to be, whether it is a one-time alert or a complex recurring schedule.

Key Features

- Automated email dispatch with optional file attachments (up to 20MB).
- Advanced scheduling (Daily, Weekly, Monthly, Yearly).
- Visual calendar tracking with color-coded health statuses.
- Role-based access control (Standard Users vs. Administrators).

Best Practices

- **Supported Browsers:** For the best experience, use the latest versions of Chrome, Edge, Safari, or Firefox.
- **Email Formatting:** When entering multiple email addresses, you **must** separate them with a semicolon (;). Example: `manager@aequs.com; team@aequs.com`.

2 Accessing the System

Logging In

1. Navigate to the AEQUS Reminder System login page.
2. Enter your assigned **Username** and **Password**.
3. Click **Login**. *(Note: If you forget your password, please contact an Administrator to reset it).*

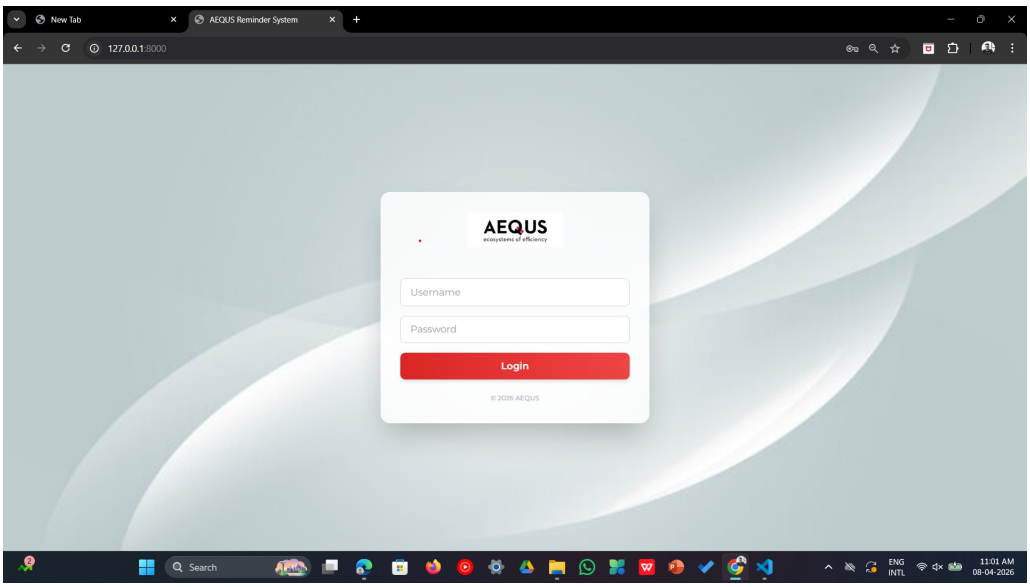

Figure 1: The Login Page Interface

Viewing Your Profile

Once logged in, you can view your account details by clicking on your username or navigating to the **Profile** section. Here you will see your Account Type (User, Admin, or Superuser), the email associated with your account, and your last login date.

3 Navigating the Dashboard

The Dashboard is your primary workspace. It is divided into three main sections:

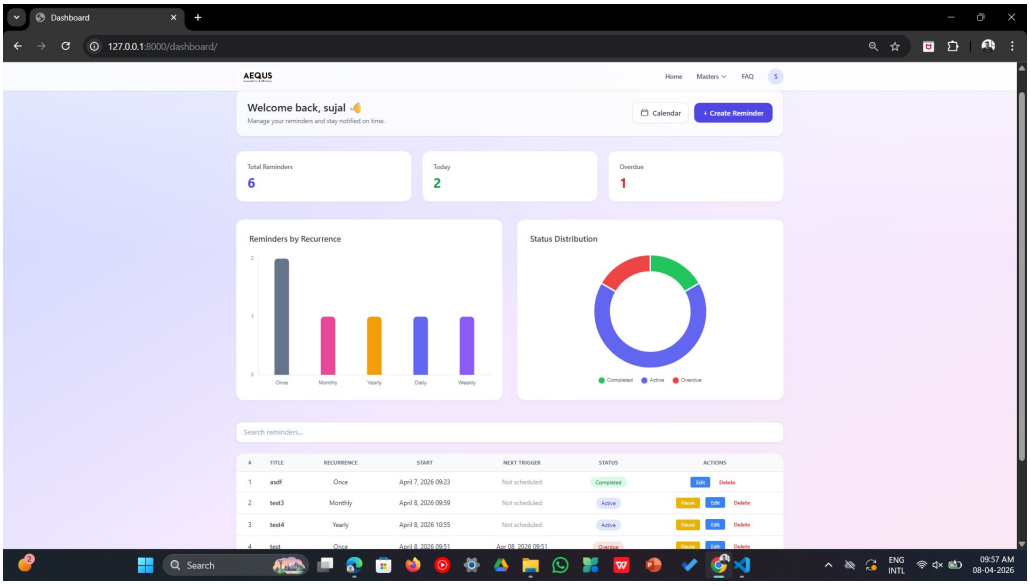

Figure 2: The Main Dashboard View

1. The Summary Bar

At the top of the screen, you will see three quick-glance metrics:

- **Total Reminders:** The total number of active, paused, and completed tasks in your account.
- **Today:** The number of tasks scheduled to trigger today.
- **Overdue:** Tasks that failed to send or missed their scheduled window.

2. Analytics Charts

- **Recurrence Chart (Bar Graph):** Shows how your tasks are distributed by their repeating schedule (One-Time, Daily, Weekly, etc.).
- **Status Chart (Donut Graph):** Displays the health of your reminders (Active, Completed, Paused, etc.).

3. The Reminder Table

This table lists all your tasks.

- Use the **Search Bar** to instantly filter tasks by their Title.
- Use the **Actions** column to Edit, Pause/Resume, or Delete a reminder.

4 Creating & Managing Reminders

Step 1: Basic Information

To create a new task, click the + **Create Reminder** button on the Dashboard.

- **Title & Subject (Required):** The Title is for your internal tracking. The Subject will be the actual Subject Line of the email sent.
- **Purpose:** A detailed description of the task. This is included in the body of the email.
- **Category:** Tag your reminder (e.g., "HR", "Operations") for easy filtering on the Calendar.
- **Attachment:** You may upload a single file (PDF, Word, Excel, PowerPoint, or TXT). Maximum size: 20MB.
- **Start Date & Time (Required):** When the very first email should be sent.
- **Email To & CC:** Enter the recipients. Use a semicolon (;) to separate multiple emails.

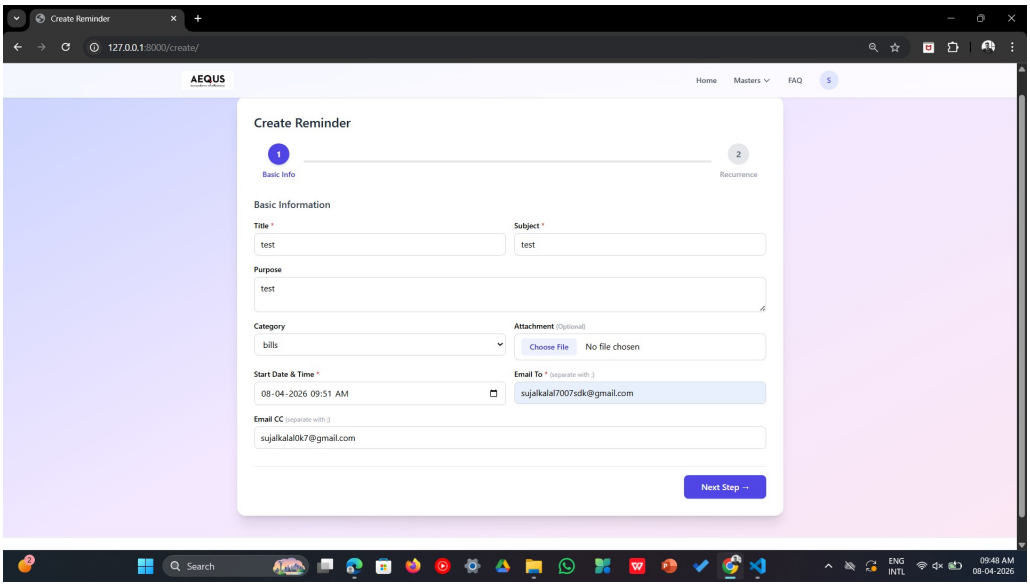

Figure 3: Basic Information Form

Step 2: Recurrence Settings (Scheduling)

Click **Next Step** to define how often the email sends.

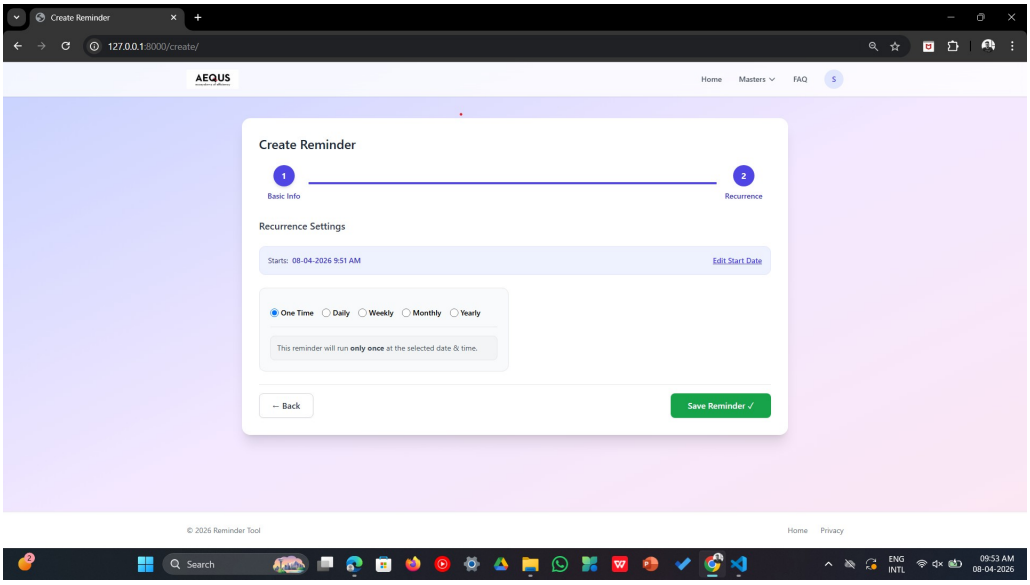

Figure 4: Configuring Recurrence Settings

- **One Time:** Sends exactly once at the Start Date & Time.
- **Daily:**
  - *Every X Days:* Triggers every set number of days (e.g., every 3 days).
  - *Every Weekday:* Triggers only Monday through Friday.
  - *Hourly Sub-interval:* You can tell a daily task to repeat every X hours on the days it is active.
- **Weekly:** Select specific days of the week (e.g., Every 2 weeks on Tuesday and Thursday).
- **Monthly:** By Day (e.g., The 15th of every month) or By Pattern (e.g., The First Monday of every month).
- **Yearly:** By Date (e.g., October 31st every year) or By Pattern (e.g., The Last Friday of November).

Step 3: End Ranges

If you select a repeating schedule, you must tell the system when to stop.

- **End by a specific date:** The system will stop sending emails after this calendar date.
- **End after occurrences:** The system will stop after sending the email exactly X times.

Pausing and Editing

- **Pause:** Clicking "Pause" on the dashboard temporarily suspends the task. It will not send emails until you click "Resume".
- **Edit:** Modifying a task will recalculate its next send time. *Note: You cannot change the Start Time to a date in the past.*

5 Using the Calendar View

The Calendar provides a bird's-eye view of your schedule. Access it via the **Calendar** button on the Dashboard.

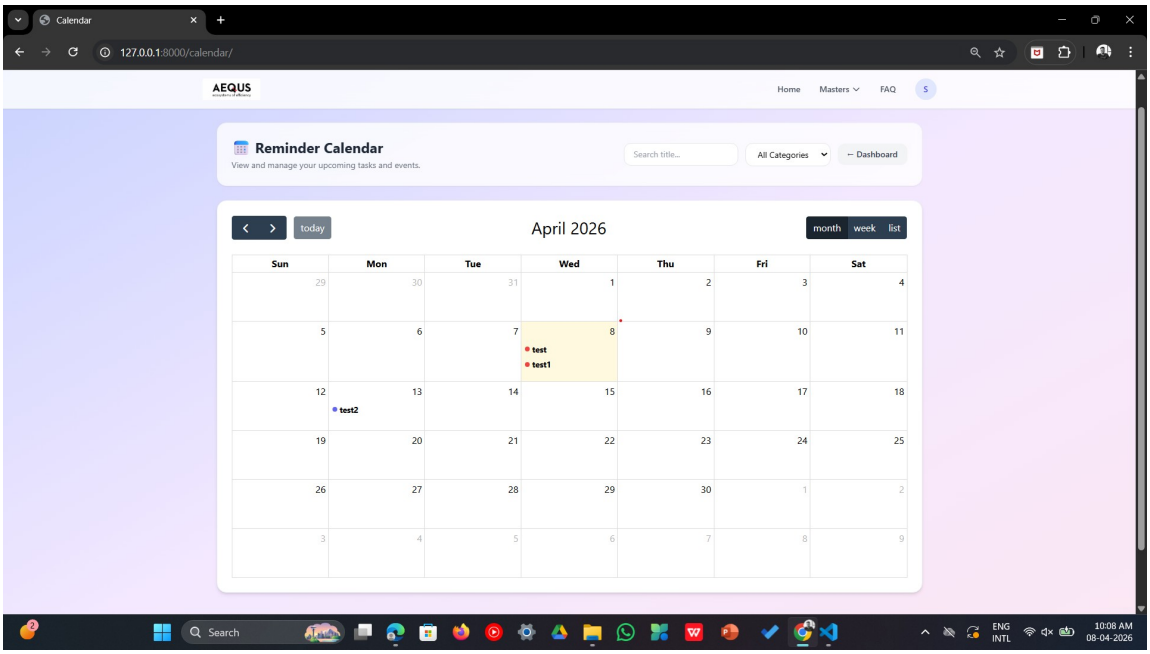

Figure 5: Monthly Calendar View

- **Views:** Switch between Month, Week, and List views using the buttons in the top right.
- **Filters:** Use the drop-down menu to filter tasks by Category (e.g., view only "IT" tasks), or use the search bar to find specific titles.
- **Event Details:** Click on any task block on the calendar to open a pop-up card showing the email recipients, the full purpose, and the exact send time.

Status Color Legend

Color Badge	Meaning
Completed	The task has finished its entire schedule.
Active	The task is scheduled and waiting in the queue.
Notified	An email was recently sent successfully.
Paused	The task is manually suspended.
Overdue / Failed	The task encountered an error or missed its trigger.

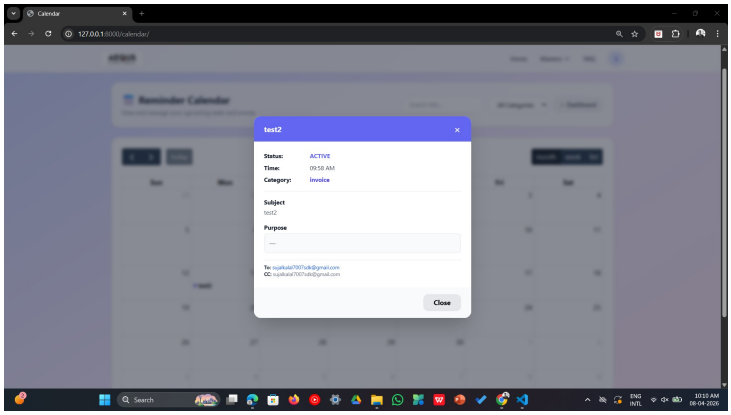

Figure 6: Detailed Event Summary Card

6 Administrator Guide (Staff Only)

Users with an **Admin** or **Superuser** role have access to system-wide settings via the navigation menu.

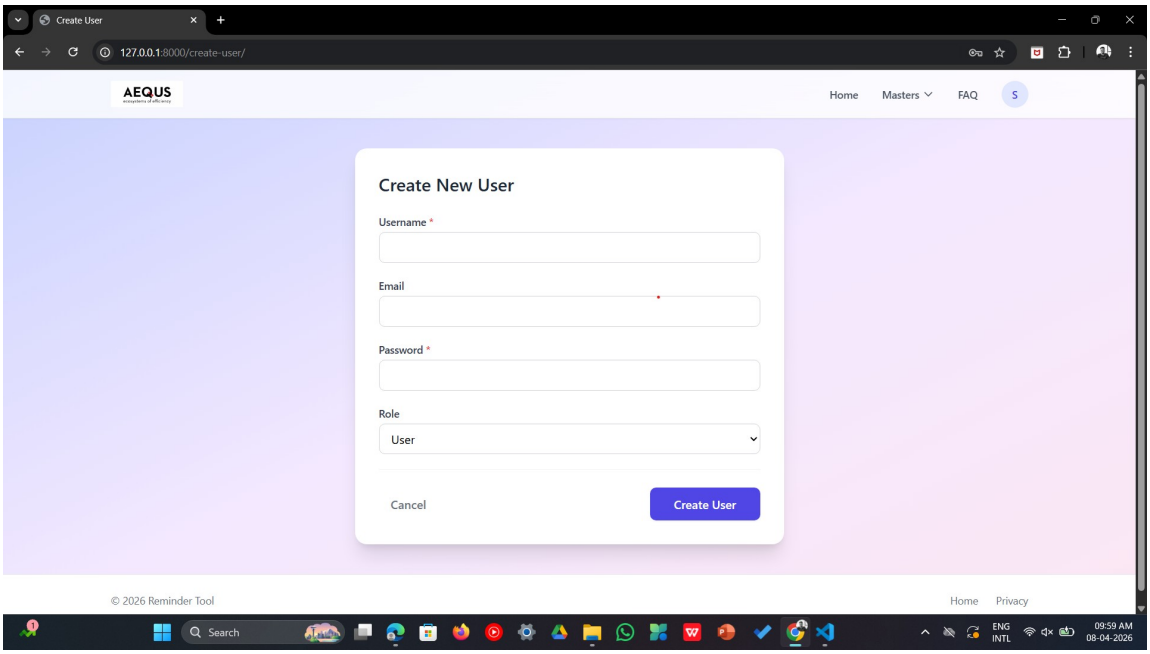

Figure 7: The User Management Interface

User Management

- **Creating Users:** Go to "Users" and click "+ Create User". You must provide a Username and Password. You can assign them as a standard "User" or an "Admin".
- **Editing Users:** You can update emails and reset passwords for other users.
- **Security Rules:** Admins cannot delete their own accounts, nor can they edit/delete the master Superuser account.

Category Master

Categories help users organize tasks.

- **Add a Category:** Provide a name and select a hex color to visually distinguish it on the calendar.
- **Activate/Deactivate:** If a category is no longer needed, click "Deactivate". It will disappear from the Reminder creation form, but historical tasks using that category will not be broken.

FAQ Master

Manage the "Frequently Asked Questions" page visible to all users. Adding helpful guides here will reduce the number of support requests you receive.

7 Troubleshooting & FAQs

Q: I entered multiple emails, but the system threw an error.
A: Ensure you are using a semicolon (;) to separate emails, not a comma. Example: `john@aequs.com; jane@aequs.com`.

Q: My file won't upload.
A: Ensure the file is under 20MB and is an approved format (PDF, Word, Excel, PowerPoint, or standard text file). Executable files (.exe) are strictly prohibited.

Q: A reminder is marked as "Overdue" (Red). What does this mean?
A: This means the scheduled time passed, but the background system was unable to process it. You can edit the reminder to reset its schedule.

Q: The system says my reminder was "Notified" (Blue), but the recipient didn't get the email. Why?
A: Corporate firewalls or strict spam filters sometimes intercept automated emails. Ask the recipient to check their Junk/Spam folder and whitelist the system's sender address.

Q: My reminder fired at the wrong time. How do I fix this?
A: The system relies on the time zone configured on the server. If your local time differs from the server time, your reminders may appear offset. Please contact an Administrator to verify the server's time zone settings.

Q: If I edit a recurring reminder, does it change all future reminders?
A: Yes. Editing a reminder updates its rules moving forward and will immediately recalculate the next scheduled trigger based on your new settings.

Q: I forgot my password and cannot log in.
A: Passwords are encrypted and cannot be recovered. Please contact a System Administrator. They can locate your account in the User Management dashboard and set a new password for you.
